Career Objective

As a motivated and passionate fullstack developer, I am dedicated to creating visually stunning, user-friendly and functional websites. I enjoy working with different teams so I want to contribute my knowledge in fixing issues, testing designs and staying updated on the latest trends. My goal is to have a great career where I can use my skills to improve how people experience websites.

Skills and Technologies

FrontEnd: HTML5, CSS3, JavaScript(ES6+), React, Responsive Design(Tailwind CSS), UI Library(DaisyUI, FloatUI, HiperUI)

BackEnd: Nodejs, ExpressJS, MongoDB, RESTful API Design, Authentication and Authorization(JWT), Morgan

Database: MongoDB, Mongoose

Auth: Firebase Authentication

Payment: Stripe API Integration

Version Control: Git, Github

Hosting: Vercel, Firebase Hosting, Github Pages, Render

Package Managers: bun, pnpm, npm

Relevant Projects

LifeFlow – Blood Donation Application

[Live](#) [Client](#) [Server](#)

Stack: MERN

Duration: 4d 18h 54m(waketime)

Key Features:

- **Responsive Dashboard:** Intuitive interface for donors, volunteers, and admins to manage requests, profiles, and content.
- **Role-Based Access:** Distinct permissions for admins, donors, and volunteers, ensuring secure and tailored interactions.
- **Dynamic Requests:** Users can create, view, and manage donation requests with real-time updates and donor information for efficient connections.

Technology:

- Frontend: React, TailwindCSS, Firebase, Tanstack Query, Jodit React, AOS
- Backend: Node.js, Express.js, MongoDB, Mongoose, JWT, Stripe.

HireHarbor – Job Search Application

[Live](#) [Client](#) [Server](#)

Stack: MERN

Duration: 2d 15h 47m(waketime)

Key Features:

- **Job Filtering Tabs:** Unique tab system for seamless filtering of job categories—on-site, remote, hybrid, and part-time.
- **Personalised Dashboard:** User-centric pages like "My Jobs" and "Applied Jobs" for efficient management of posted and applied jobs.
- **Private Job Creation:** The "Add A Job" page is a private route for logged-in users to create, edit, and track job listings with real-time applicant updates.

Technology:

- **Frontend:** React, TailwindCSS, Firebase, EmailJS, Tanstack Query, React DatePicker, React to pdf, Sweetalert2, React-hot-toast
- **Backend:** Node.js, Express.js, MongoDB, JWT.

TechVenture – ECommerce Application

[Live](#) [Client](#) [Server](#)

Stack: MERN

Duration: 1d 13h 21m(waketime)

Key Features:

- **Diverse E-commerce Site:** Created a visually appealing and user-friendly e-commerce platform with a unique product range.
- **Secure Authentication:** Integrated a robust authentication system with email/password and social logins for a secure user experience.
- **Responsive Shopping:** Developed a dynamic shopping experience, including product details, cart management, and updates, ensuring user engagement.

Technology:

- **Frontend:** React, TailwindCSS, Firebase, SwiperJS, Sweetalert2, Sonner
- **Backend:** Node.js, Express.js, MongoDB.
